Just clone from the site:<https://share.weiyun.com/2d1d66fb70779a7ee6938c102f25798f#> which is mainly contributed by the original author and, I wrote a simple automator application for Mac user to disable the gatekeeper, the binary will be upload as well. Much more appreciation to the original author.

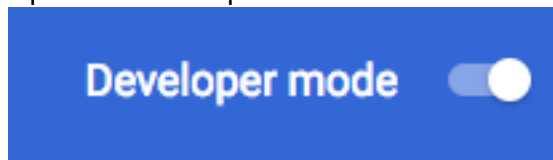

這只是對原作者的分流, 國外用戶, 下載weiyun實在是速度太過於感人. 順帶的, 我更新了, mac下的chrome 添加策略白名單的方式, 以及, 用automator寫了一鍵禁用Gatekeeper的小軟件, 稍後也會把binaries公佈出來. 還有, 我才知道, 原來在github上要pull request這麼麻煩, 感謝原作者. 謝謝.

2. Open your chrome, and mine version is, v65

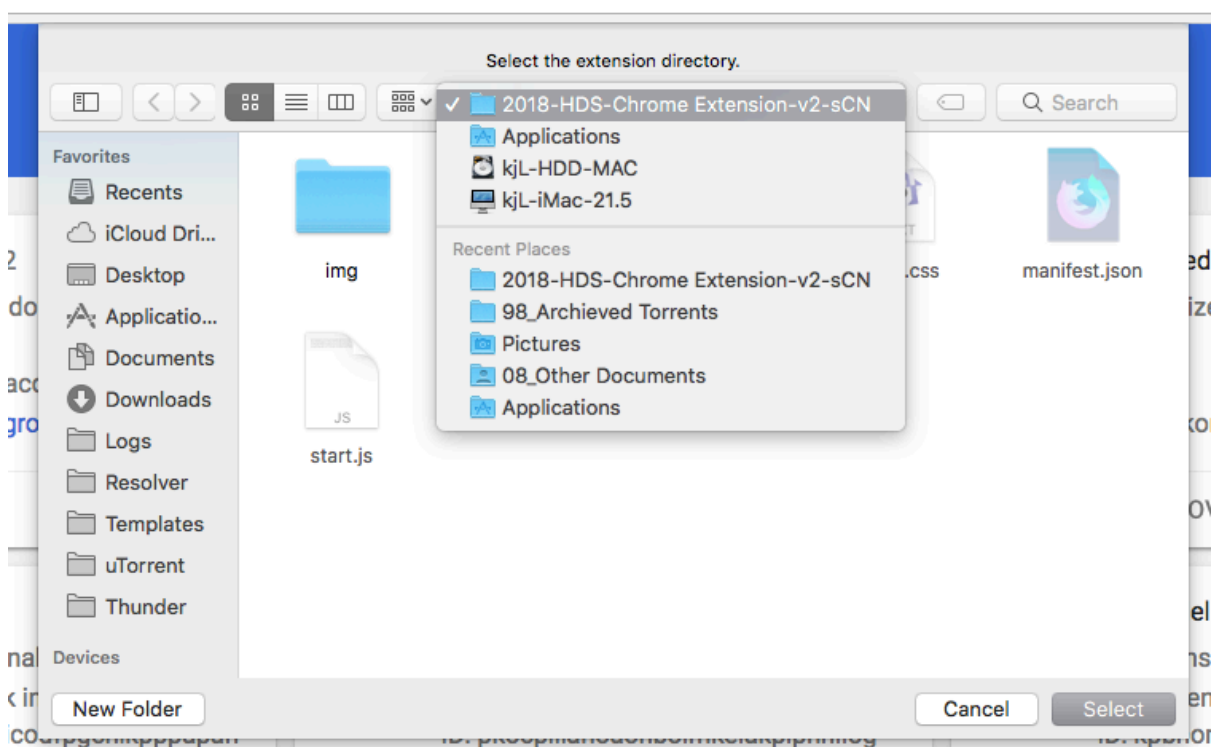

3. Key-in the chrome://extensions/ or open the extensions page

4. Open the Developer Mode and mine is at the right-upper corner

5. Press at the button, "Load Unpacked"
6. Locate to the extensions where you downloaded and unzipped, and mine is at the /Application where I suggest to put at, and click on the button, "Select"

7. There it is and you would notice that, there is an “id”, copy it.

8. Open the .mobileconfig you downloaded by Text Editor, (BBEdit maybe), and locate to the line no. 19, 20 and 21.

```
1 <?xml version="1.0" encoding="UTF-8"?>~
2 <!DOCTYPE plist PUBLIC "-//Apple//DTD PLIST 1.0//EN"
3 "http://www.apple.com/DTDs/PropertyList-1.0.dtd">~
4 <plist version="1.0">~
5 <dict>~
6 ...<key>PayloadContent</key>~
7 ...<array>~
8 ...<dict>~
9 ...<key>PayloadContent</key>~
10 ...<dict>~
11 ...<key>com.google.Chrome</key>~
12 ...<dict>~
13 ...<key>Forced</key>~
14 ...<array>~
15 ...<dict>~
16 ...<key>mcx_preference_settings</key>~
17 ...<dict>~
18 ...<key>ExtensionInstallWhitelist</key>~
19 ...<array>~
20 ...<string>PUT STH AT HERE</string>~
21 ...<string>value02</string>~
22 ...<string>value03</string>~
23 ...</array>~
24 ...</dict>~
25 ...</dict>~
26 ...</plist>~
```

9. Paste your id there and, click on save and then run it.

10. THAT's ALL.
